HARI OM KASAUNDHAN

+91-9005979045 sangamgupta988@gmail.com LinkedIn GitHub Portfolio

Education

Dr. A.P.J. Abdul Kalam Technical University 2023 – 2026
Bachelor of Technology in Computer Science Engineering
Board of Technical Education, Uttar Pradesh 2020 – 2023
Polytechnic Diploma in Computer Science

Technical Skills

Languages: Java, JavaScript, Python, SQL
Frontend: React.js, Next.js, HTML5, CSS, Tailwind CSS
Backend: Node.js, Express.js, Django, FastAPI
Databases: MongoDB, PostgreSQL
Core CS: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Concepts: REST API Development, System Design, Scalable Architecture, Cloud Deployment, Authentication (JWT/OAuth), Performance Optimization, Microservices, CI/CD

Experience

Full Stack Developer — PureWashr Mar 2024 – Feb 2025

- Architected and deployed a scalable MERN-based platform serving **500+ active users**, enabling real-time scheduling and order tracking.
- Engineered RESTful APIs and integrated **15+ vendor workflows**, improving system scalability and operational efficiency.
- Optimized backend performance and reduced latency by **40%** through query optimization and efficient API design.

Freelance Software Developer Jun 2023 – Feb 2024

- Built production-grade authentication systems, dashboards, and automation tools for multiple client-style projects.
- Improved API performance and reduced response time by **50%** using optimized backend logic and caching strategies.

Projects

AlgoFlow Tracker — Full Stack DSA Analytics Platform Live GitHub

- Engineered a scalable full-stack platform using Next.js and MongoDB to track DSA progress with real-time analytics and secure authentication.
- Designed cloud-deployed architecture and optimized REST APIs ensuring high availability and performance.

ATS Resume Checker — AI Powered Live GitHub

- Developed AI-powered resume analysis system using Google Gemini API for ATS scoring, keyword optimization, and semantic evaluation.
- Built interactive Streamlit interface delivering real-time feedback and improving resume quality.

AI Traffic Light Simulation (SYNCRONET-AI) GitHub

- Designed adaptive AI traffic control system using vehicle density algorithms and real-time signal optimization.
- Simulated smart traffic environment using Python and Pygame to reduce congestion and improve traffic flow.

Hand Gesture Control System GitHub

- Built computer vision-based control system using OpenCV and MediaPipe for gesture and voice-based interaction.
- Enabled touchless control and multimodal input improving usability and accessibility.

Achievements

- Secured **INR 1L+ funding** and Startup India recognition for PureWashr platform.
- Developed multiple AI-driven systems including AI Desktop Assistant and Traffic Automation simulation.
- Certified in Java and Problem Solving — ApnaCollege.
